

# Air Conditioning Installations

There are new technologies that make it simple to have the comfort of central air at a fraction of the cost. For example, many of our customers without central air systems are opting for the new mini-split ductless systems that are efficient and very effective. Also, did you know that if you have a hot air heating system, you already have the duct work to install a central air conditioning system? If this is the case, you can install a system for a fraction of the cost.

**Call us for a free consultation!** Our technicians are experts in installing all types of air conditioning systems and can recommend the most efficient and cost effective way to stay comfortable all summer long.

## \$200\*

### TOWARD A CENTRAL A/C INSTALLATION

Save this coupon for \$200 toward your next A/C installation.

\*Only applies to AC installations

## \$100\*

### TOWARD A SPLIT DUCT A/C INSTALLATION

Save this coupon for \$100 toward a split duct A/C installation.

\*Only applies to a split duct AC installation

# Get Ready for Summer

WITH LANDRY & MARTIN OIL CO., INC.

Stay cool this summer with reliable air conditioning service from the energy company you trust!

## Services We Provide:

- Air Conditioning System Installations
- Annual Air Conditioning System Tune-Up

Quiet, Efficient, and Affordable Comfort

## Small Duct High Velocity Central Heating & A/C System

- Quiet design installs in unconventional, confined spaces, even with no existing ductwork for virtually no loss of usable space
- Compact ducts and minimal material removal provide both heat and central air
- Actively circulates the air via small outlets mounted in the wall, floor or ceiling
- Removes 30% more humidity to allow energy-saving thermostat settling
- Flexible ducts prevent dust and mold from collecting in the passages

# \$150\*

TOWARD A SPACEPAK  
INSTALLATION

Save this coupon for \$150 toward your next SpacePak installation.

\*Only applies to AC installations

## Annual Maintenance = Annual Savings

Normal usage and general wear and tear can make your A/C system work harder. Airborne dirt and debris will clog filters and affect proper and efficient operation. This can also result in greater-than-normal wear on fans, motors, and other moving parts within the system. This makes an annual maintenance program very important for your system.

Receive the service you deserve and the maintenance your system needs with our annual A/C tune-up!

We service all types of air conditioning systems including central, split ductless, and high velocity. Keep your system running smoothly and efficiently all summer long!

## 16-POINT COOLING SYSTEM TUNE-UP

- Check refrigerant charge and measure operating pressures and temperature
- Test compressor operating voltage and amperage
- Lubricate and check motors
- Clean or replace standard filters as necessary
- Inspect and adjust fan belts
- Flush and drain condensate
- Check electrical connections
- Clean and check thermostat
- Check controls and safety switches
- Inspect evaporator coil if accessible
- Check blower wheel and bearings
- Test pressure cutout switches
- Inspect crankcase heater
- Inspect condenser coil
- Check condenser blade and motor bearings
- Check condenser electrical disconnect switch
